

IIFCL Projects Limited (IPL) to support World Bank in conducting comprehensive study on energy efficiency, de-carbonization technology, etc.

Taking forward the considerable efforts of the nation towards Greener economy, IIFCL Projects Limited, a subsidiary of IIFCL has taken the initiative of supporting the World Bank to conduct a comprehensive diagnostic study on pilot basis of selected clusters across India.

The study aims to identify cost effective low-carbon interventions such as energy-efficient measures, clean alternative energy sources to reduce GHG emissions and adopt de-carbonization technologies.

Moreover, the project aims to develop a robust policy framework, regulatory measures, and financial instruments to support low-carbon objectives in the MSME space.

With this association, IIFCL in collaboration with its subsidiary - IPL is working towards contributing to the journey of realizing VIKASIT BHARAT with a clear ROADMAP for DECARBONIZATION!
